My Contributions:

My part is the proccess_order.php. Besides, I also help my partners with the fix_order.php and manaer.php. And I am the person who check and test the result.

Reflection and Discussion:

My team worked very well. Everyone is very sociable and cooperative. Everything went smoothly and quickly. Everyone helps me a lot. Through this assignment, I learned how to work in php, mysql and also how to work in a team. PHP and MySQL are actually not difficult but it requires high logical thinking and this is what I got. The website works very smoothly and is highly scientific and logical. This assignment is highly practical because it can be applied in practice.

Conclusion:

In this report, I made it clear about Website, My Contributions, Reflection and Discussion. I also state my opinion of each new page, its functions, and the progress of the product. In addition, I also highlight the enhancements available on our website.
